

CRI PHARMABRAILLE READER

CRI PharmaBraille Reader is a special tool to read PharmaBraille codes stamped on medicine box

- Available as custom Matrox MIL module or custom Matrox Design Assistant step.
- Users need to specify the dot size, the number of lines and number of expected characters in a single line.
- Location of the region with PharmaBraille codes is detected automatically.
- The tool reads PharmaBraille codes at any angle and with varying contrast.
- It recognizes blank spaces, punctuation marks and special forming codes as capital letter and number.
- The PharmaBraille Reader tool provides greater robustness and flexibility than traditional character recognition tools.
