

# Zebra GevlQ 🍑

Smart network interface cards for efficient high-bandwidth GigE Vision acquisition

### **Overview**

#### Efficient high-bandwidth GigE Vision acquisition

<u>Zebra<sup>®</sup> GevlQ</u> is the industry's first network interface card (NIC) offering generic GigE Vision<sup>®</sup> acquisition offload at speeds up to 25 Gigabits/s per port. With GigE Vision packet processing performed directly onboard, Zebra GevlQ boards enable capture from one or more cameras without any image data loss.

GigE Vision is a camera interface standard that delivers image transfer at high-speed over large distances using standard copper fiber-optic Ethernet cabling. Use of 10 and 25 GbE by cameras are gaining industry popularity as they are ideal for vision applications requiring the utmost imaging speed and resolution. Machine vision applications requiring cameras with a 10+ GbE interface can, however, be challenging—they benefit from a high data transmission rate but suffer from increased demands on the host system, resulting in corrupted or dropped image frames, and increased processing latency.

Zebra GevIQ NICs provide a more versatile and widely compatible alternative to custom-built or proprietary solutions based on 10+ GbE. The board is equipped with two 25 GbE ports and acquires from these with very little host CPU usage. Multiple 1, 2.5, 5, or 10 GbE cameras can be aggregated at each port for a total of up to 32 input sources. Support of the standard SFP28 connector allows users to select from standard RJ45, direct attach copper (DAC) or fiber-optic Ethernet cables for their specific installation requirements.

#### Zebra GevIQ at a glance

Reliably and efficiently acquire at up to 25 Gigabit/s per port through onboard packet processing

Maintain maximum flexibility with support for generic GigE Vision cameras

**Readily and cost-effectively support multi-camera setups** through two ports, together capable of handling up to 32 cameras

**Cater to a range of cabling needs** with support for copper and fiber-optic Ethernet cabling

Directly license <u>Aurora Imaging software</u>, formerly Matrox Imaging Software, with integrated license fingerprint and storage

Monitor and troubleshoot acquisition performance in detail using Aurora Gecho event-logging tool

### **Software Environment**

#### Pairs with Aurora Imaging Library<sup>1</sup> software

Zebra GevIQ boards support 64-bit Windows<sup>\*</sup> and Linux<sup>\*2</sup> through the latest <u>Aurora Imaging Library</u> software. The cards also act as a license fingerprint and can store a supplemental license for Aurora Imaging software, avoiding the need for a separate hardware key.

#### **Camera configuration and test utility**

Aurora Capture Works is a utility that allows users to rapidly evaluate the performance and functionality of virtually any GigE Visioncompliant camera or 3D sensor. Aurora Capture Works will list all detected GigE Vision-compliant devices connected to each allocated board. It can start or stop capturing images, display acquired images, save the last grabbed image, send a software trigger, as well as browse and control the selected device's features. Users can view and change acquisition properties, as well as view acquisition statistics. Aurora Capture Works is distributed with <u>Aurora Imaging Library</u> software; it is also available with <u>Aurora Imaging Library-Lite.</u>

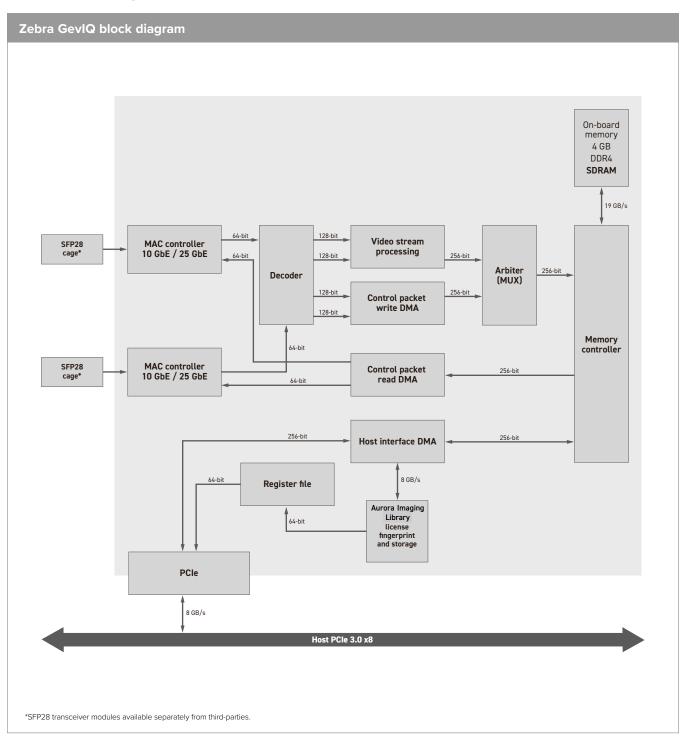

#### Thorough acquisition monitoring utility

Offered with the above-mentioned software is Aurora Gecho, a logging utility that records events generated by the Zebra GevIQ device driver and saves these to a JSON or CSV file. The utility is made to run concurrently with the application to log acquisition activity for the purpose of troubleshooting capture errors as well as measuring latencies and execution times to identify performance bottlenecks. Resulting trace files can be loaded into Google Perfetto for viewing on an interactively navigable graphical timeline. Aurora Gecho helps developers optimize image capture and make sure it runs as intended.

### Connectivity

## **Specifications**

Zebra GevlQ		
Hardware		
Model	Zebra GevlQ	
Host interface		
Interconnect	PCle <sup>®</sup> 3.1 x8	
Camera/video interface		
Standard	GigE Vision	
Configuration	Two (2) network ports	
Speeds	1 / 2.5 / 5 / 10 / 25 Gbps	
Video inputs	Up to 32 cameras through network switches	
Connectors	SFP28	
Miscellaneous	Connection-status indicator LEDs	
Memory		
Туре	DDR4 SDRAM	
Quantity	4 GB	
Purpose	Image buffering	
Image processing capab	ilities	
Onboard look-up tables	8-/10-/12-bit support	
Onboard Bayer interpolation	GB, BG, GR, and RG pattern support	
Onboard color space conversion	Input formats: 8-/16-bit mono/Bayer, 24-/48-bit packed BGR	
	Output formats: 8-/16-bit mono, 24-/48-bit packed/planar BGR, 16-bit YUV, 16-bit YCbCR, 32-bit BGRa	
Physical		
Form factor	Half-length, half-height, PCle add-in card	
Dimensions (L x W x H)	4.86 x 2.16 x 6.91 cm (5.85 x 0.85 x 2.72 in)	
Environmental		
Operating temperature	With passive heatsink: 0°C to 45°C (32°F to 113°F) <sup>3</sup>	
Relative humidity (operating)	20% to 80% (non-condensing)	
Relative humidity (storage)	10% to 90% relative humidity (non-condensing)	
Certifications		
Electromagnetic compatibility	FCC Class A	
Software		
Compatible software	Aurora Imaging Library	
Operating system support	Windows 10 and 11 (64-bit)	
	Linux <sup>2</sup>	
Licensing provisions	Aurora Imaging Library license fingerprint and storage	

### **Ordering Information**

Part number	Description	
Hardware		
GIQ4G2SF28	Zebra GevIQ PCIe 3.1 x8 add-in card for GigE Vision interface and offload with 4 GB DDR4 SDRAM, two SFP28 ports and a passive heatsink <sup>3</sup> . Partially licensed for Aurora Imaging Library software.	
Software		
Included with GIQ4G2SF28	Licensed for the Aurora Imaging Library Interface (GigE Vision) run-time package. See Aurora Imaging Library datasheet for more information. Aurora Imaging Library software available for download from <a href="http://www.matrox.com/imaging">www.matrox.com/imaging</a> Support Aurora Imaging Library software available for download from <a href="http://www.matrox.com/imaging">www.matrox.com/imaging</a> Support Aurora Imaging Library software available for download from <a href="http://www.matrox.com/imaging">www.matrox.com/imaging</a> Support Aurora Imaging Library software available for download from <a href="http://www.matrox.com/imaging">www.matrox.com/imaging</a> Support Aurora Imaging Library software available for download from <a href="http://www.matrox.com/imaging">www.matrox.com/imaging</a> Support Aurora Imaging Library Software available for download from <a href="http://www.matrox.com/imaging">www.matrox.com/imaging</a> Support Aurora Imaging Library Software available for download from <a href="http://www.matrox.com/imaging">www.matrox.com/imaging</a> Support Aurora Imaging Library Software available for download from <a href="http://www.matrox.com/imaging">www.matrox.com/imaging</a> Support Aurora Imaging Library Software available for download from <a href="http://www.matrox.com/imaging">www.matrox.com/imaging</a> Support Aurora Imaging Library Software available for download from <a href="http://www.matrox.com/imaging">www.matrox.com/imaging</a> Support Aurora Imaging Library Software available for download from <a href="http://www.matrox.com/imaging">www.matrox.com/imaging</a> Support Aurora Imaging Library Software available for download from <a href="http://www.matrox.com/imaging">www.matrox.com/imaging</a> Support Aurora Imaging Library Software available for download from <a href="http://www.matrox.com/imaging">www.matrox.com/imaging</a> Software available for download from <a href="http://www.matrox.com/imaging">www.matrox.com/imaging</a> (ware software software software software software sof	
Accessories		
Available from third parties	SFP28 direct attach copper and active optical connectors and cables.	

Endnotes:

2. Ask for availability.

As to availability.
Operating temperature rating assumes airflow of 150 LFM (linear feet per minute) over the board.
Contact a Aurora Imaging sales representative for ventilation requirement for multiple board configurations.
